

## COVID-19 Health Screening

Updated 4/1/2021

To enter the facility, you must answer "No" to all questions below:

**In the past 48 hours have you had any of these common symptoms of COVID-19:**

- Cough
- Sore throat
- Shortness of breath
- Temperature above 100.3
- New or worsening headache
- Gastrointestinal symptoms (nausea, vomiting or diarrhea)
- Loss of taste or smell

**In the past 14 days has anyone in your household had close contact with a confirmed or suspected case of COVID-19?**

**In the past 14 days has anyone in your household been put in quarantine for COVID-19?**

**In the past 14 days has anyone in your household tested positive for COVID-19 ~or~ been tested and not yet received results?**

**NYS Travel Advisory (Last Update 4/1/2021).**

**Please check the state website for updates after traveling:**

The travel guidelines require all New Yorkers, as well as those visiting from out-of-state or another country, to take personal responsibility for compliance in the best interest of public health and safety.

Asymptomatic travelers entering New York from another U.S. state or territory **are no longer required** to test or quarantine as of April 1, 2021. Quarantine, consistent with the CDC recommendations for international travel, is **still recommended** for domestic travelers who are not fully vaccinated or have not recovered from laboratory confirmed COVID-19 during the previous 3 months. Symptomatic travelers must immediately self-isolate and contact the local health department or their healthcare providers to determine if they should seek COVID-19 testing.

All travelers entering New York from a state that is not a contiguous state who have been outside of New York for more than 24 hours must complete the [Traveler Health Form](#). Contiguous states to New York are Pennsylvania, New Jersey, Connecticut, Massachusetts and Vermont.

Irrespective of quarantine, all travelers must:

- Monitor symptoms daily from day of arrival in New York through day 14;
- Continue strict adherence to all recommended non-pharmaceutical interventions, including hand hygiene and the use of face coverings, through Day 14 (even if fully vaccinated); and
- **Must immediately self-isolate** if any symptoms develop and contact the local public health authority or their healthcare provider to report this change in clinical status and determine if they should seek testing.

**This Health Screening must be checked every time you will enter the facility.**
